

Sprint 3 - Meeting Minutes – 15th February

Present: Moad Sati, Rory Thomson-Bird, Qasim Baig, Rayyan Nomaan, Adil Mushtaq, Yousif Luay, Francesca Coss & Luna Cheung

Minute Taker: Francesca Coss

Tasks to be worked on:

- Loading data
- Ingredients
- Menu filtering
- Database – GUI integration and merging (requires a synchronisation merge with backend)
- Restaurant Staff login button and scene (Yousif has made the login branch with functionality)
- Credentials list
- Fixing the TDD and developing further tests
- Continuing the Javadoc

Backend:

- Write comments for their respective button functions so the frontend team can link them with the GUI buttons.
- Work on the queries and uploading data to the database.
- PSQL queries and menu filtering
- AWS – User settings to be set for different types of users: Admin, Viewer only and editor

Frontend:

- Implement functions by connecting with the FXML code (customer, staff and kitchen scenes)
- Make GUI look better – CSS
